## [Aluminum Profile Extrusion](#)

### **Aluminum Profile Extrusion**

Hentec Company is an aluminum profile extrusion manufacturer and supplier, located in China. With over ten years of experience in the field, we are able to offer a wide range of aluminum extrusions. We can also customize our products according to customers' drawings.

The aluminum profile extrusion is very easy to install and disassemble, making it the ideal product for manufacturers who want to transform or upgrade assembly lines quickly and affordably. Currently the aluminum extrusion is increasingly used in custom-built structures, machine guards, workstations, and material handling systems.

Due to the extrusion process, aluminium's strength is greatly increased. Thus, aluminum profile extrusions are much more durable and reliable. In addition, they vary in size and shape, and can be easily adapted. Although aluminium extrusion products are particularly used in the construction industry, structural aluminum components can also be found in marine applications, the automotive industry.

The aluminum profile extrusion has many advantages. It is quick to manufacture, and can be used alone or easily interlocked with another metal part. Because aluminum is naturally coated with surface oxide layer, the aluminum extrusion is corrosion resistant. Moreover, it can tolerate high temperatures without producing toxic fumes, and is a good conductor of heat and electricity.

Whether you are looking for aluminum profile extrusion, curtain wall aluminum profile, or aluminum solar panel frame, we at Hentec can help you with your needs. Manufactured using superior raw material and high precision equipment, our aluminum products are high quality.

To ensure customers feel at ease in using our products, we offer a 10-year warranty on our aluminum extrusion profile and a 15-year warranty on our solar panel frame. Our company is located in Jiangyin, Jiangsu Province, near the Yangtze River. Here we enjoy convenient water and land transportation, which allows us to deliver our products to global customers quickly and cheaply.

Thank you for viewing our website! We at Hentec are looking forward to working with you!
